Testimonial:

The price tag of a starts up company is hefty, but with the help of Triad they helped ease some of that cost with an affordable, well designed wood wall panel line. The Diamond Quad Framing Table does everything it says it would. Was it worth the money? I can confirm that it definitely was.

The Diamond Quad framing Table has given us the ability to deliver production at an astounding rate with minimal man power. Triad has obviously put a lot of thought and expertise into designing it.
